DETAILED ACTION

1. Claims 1-29 are pending.

Allowable Subject Matter

2. Claims 1-29 are allowed.
3. The following is an examiner's statement of reasons for allowance: The present invention teaches a system for file transfer between geographically and organizationally distant endpoints. Each independent claim identifies the distinct feature of selecting a repository on one of the server computers based on one or more routing tokens in the file transfer request, wherein the routing tokens include one or more attributes describing the file, the client computer or an originator of the file transfer request. The closest prior art, Nakai US Patent No. 6,253,248 teaches an information processing apparatus. The prior art fails to teach the selecting of the repository based upon one or more routing tokens in the file transfer. In the instant invention, the claimed routing tokens are selected to abstractly describe the file originator of the transfer request or the file itself (Specification, page 31 paragraph 0085, Appeal Brief page 11). Thus, the cited prior art fails to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
